PROFESSIONAL SUMMARY

Python and full-stack developer who builds REST APIs and web applications with FastAPI, Django REST Framework, Next.js and React, backed by PostgreSQL and Redis. Currently works as a software developer and cyber security engineer, supporting security clients and running company websites, including SEO and AEO. Has completed two data science internships covering data cleaning, exploratory analysis, feature engineering and model evaluation in Pandas and Scikit-learn. Comfortable with JWT authentication, input validation, automated testing and Docker.

TECHNICAL SKILLS

Languages: Python, JavaScript, TypeScript, SQL, C, C++

Backend: FastAPI, Django, Django REST Framework, Flask, Node.js, Express.js, REST APIs, SSE, JWT Authentication

Frontend: React.js, Next.js, HTML5, CSS3, Responsive Design

Data Science and ML: Pandas, NumPy, Scikit-learn, TensorFlow, OpenCV, EDA, Data Cleaning, Feature Engineering, Classification, Regression, Model Evaluation

AI and Retrieval: LangGraph, Mistral, Qdrant, Embeddings, Semantic Search

Databases and Tools: PostgreSQL, MySQL, MongoDB, Redis, Docker, Git, GitHub, Linux, AWS, CI checks

Web and Security: Website Management, Plugins and Add-ons, SEO, AEO, Cyber Security

Core: Data Structures and Algorithms, OOP, API Testing, Debugging, Data Validation

PROFESSIONAL EXPERIENCE

Software Developer and Cyber Security Engineer | Grand Ortus Solution Private Limited Oct 2026 - Present

- Work directly with the company's cyber security clients as a cyber security engineer.
- Manage and maintain the company website and other company-related websites, including adding new features and add-ons.
- Handle SEO and AEO tasks on the company website.

Data Science Intern | VCBay Solutions Pvt. Ltd. Mar 2026 - Sep 2026

- Worked on analytics and data science assignments for the client Maxify, using Python and structured data-processing workflows.
- Cleaned and preprocessed datasets, ran exploratory analysis and engineered features for predictive modeling.
- Contributed to machine-learning and internal automation projects, checking dataset quality and the outputs of the analysis.

Data Science Intern | Celebal Technologies Jun 2025 - Aug 2025

- Used Python, Pandas, NumPy and Scikit-learn for preprocessing, exploratory analysis, feature engineering and predictive model development.
- Evaluated model performance and built dashboards and reports to present findings to the team.

Technical Support Specialist | AmpleTrails Biometric System Jul 2024 - Aug 2024

- Handled deployment, configuration and verification of enterprise biometric systems, and worked through reported faults to resolution.

PROJECTS

CodeForge AI | FastAPI, Next.js, PostgreSQL, Redis, Mistral GitHub

- Built a coding practice platform with a Monaco Editor, AI-assisted coding, problem generation, activity tracking and JWT authentication.
- Split the backend into API routes, services, repositories, schemas and models, with PostgreSQL, Redis and database migrations.
- Designed Docker-isolated code execution with resource limits, protected test cases and role-based administration.

DotRAG | FastAPI, React, LangGraph, Mistral, Qdrant GitHub

- Built PDF ingestion and retrieval: text extraction, chunking, embeddings and semantic search on Mistral and Qdrant.
- Added LangGraph workflows for summarization, document comparison and information extraction, with source citations and streaming over REST and SSE.

Healthcare Backend API | Django REST Framework, PostgreSQL, JWT GitHub

- Implemented registration, login, token refresh and authenticated CRUD APIs for patients, doctors and patient-doctor assignments.
- Added ownership checks, duplicate prevention, input validation and consistent error handling. The repository documents 39 tests covering authentication, validation, access control and mapping.

Vitto Loan Repayment Service | Next.js, PostgreSQL, Firebase GitHub

- Built repayment schedules, payment allocation, outstanding-balance tracking and overdue calculations behind authenticated APIs.
- Added idempotency controls to block duplicate payments, plus unit tests, PostgreSQL integration tests and CI checks for migrations, tests and builds.

Credit Card Fraud Detection | Python, Pandas, Scikit-learn

- Built a classification workflow covering transaction-data preprocessing, feature preparation and model evaluation to flag likely fraudulent transactions.

EDUCATION

B.Tech, Electronics and Communication Engineering Nov 2022 - Jun 2026

Deenbandhu Chotu Ram University of Science and Technology (DCRUST), Murthal, Haryana | CGPA: 7.75/10

CERTIFICATIONS AND ACHIEVEMENTS

- Certifications: Software Engineer, SQL (Advanced), JavaScript, Python (Google, AWS, Devtown)
- EY Techathon 4.0 participant; 3rd position in Meme Mastermind at IIT Patna
