

PROFESSIONAL SUMMARY

Full-Stack Developer and Data Science enthusiast pursuing B.Tech in Electronics & Communication Engineering (2026) at DCRUST. Hands-on experience building scalable web platforms, machine learning models, and real-time applications through multiple internships and projects. Strong expertise in React, Django, Node.js, and Python-based ML workflows with solid grounding in Data Structures & Algorithms. Passionate about developing production-ready systems, optimizing performance, and solving real-world problems using data-driven approaches.

EDUCATION

Deenbandhu Chotu Ram University of Science & Technology (DCRUST)	Murthal, Haryana
<i>B.Tech — Electronics & Communication Engineering</i>	Nov 2022 – Jun 2026
CGPA - 7.5	

EXPERIENCE

Data Science Intern Celebal Technologies	Jun 2025 – Aug 2025
- Applied machine learning and statistical analysis to solve real-world business problems - Performed EDA, data preprocessing, and feature engineering on large structured datasets - Built predictive models using Python, Pandas, NumPy, and Scikit-learn improving analytical insights - Generated actionable dashboards and reports to support data-driven decision making	
Full-Stack / Django Developer Intern CodeAlpha	May 2024 – Aug 2024
- Developed scalable full-stack web applications using Django, Next.js, and PostgreSQL - Built FashionFusion, an e-commerce platform with authentication, product management, and order workflows - Created Gemini Clone, an AI-based chat system with real-time conversations and context-aware responses - Designed RESTful APIs and optimized database queries for performance and scalability	
Frontend Developer Intern Bharat Internships	Oct 2023 – Nov 2023
- Developed three production-ready React applications with responsive UI components Toolspedia: Text transformation utilities with reusable component architecture Newsloop: Real-time news aggregation platform integrated with News API Chat-Room: Live messaging web app using React, Node.js, and WebSocket communication	
Technical Support Specialist AmpleTrails Biometric System	Jul 2024 – Aug 2024
Provided technical troubleshooting, deployment assistance, and system configuration for enterprise biometric solutions	
UI/UX & Web Developer Let Globe	Nov 2023 – Dec 2023
- Designed UI/UX flows and contributed to full-stack feature development using React and REST APIs - Collaborated on GitHub workflows including debugging, deployment, and feature implementation	

KEY PROJECTS

Real-Time Chat Application — Built using Node.js and Socket.io with authentication and live messaging Credit Card Fraud Detection — ML classification model detecting fraudulent financial transactions Breast Cancer Detection — Deep learning model for medical classification tasks MNIST Digit Classifier — Handwritten digit recognition using supervised learning algorithms Gold Price Predictor — Regression model forecasting gold prices from historical trends Face Recognition Attendance System — Python + OpenCV automated attendance marking PDF Tools Utility — Python toolkit providing multiple document processing features

TECHNICAL SKILLS

Languages: Python, JavaScript, TypeScript, C, C++
Web: HTML5, CSS3, React.js, Next.js, Node.js, Express.js, Django, Flask
Data Science: Pandas, NumPy, Scikit-learn, TensorFlow, OpenCV, Machine Learning
Databases: PostgreSQL, MySQL, MongoDB
Tools: Git, Linux (Ubuntu), Docker, AWS, REST APIs
Core CS: Data Structures & Algorithms (C++)

CERTIFICATIONS & ACHIEVEMENTS

Software Engineer, SQL (Advanced), JavaScript, Python (Google, AWS, Devtown)
EY Techathon 4.0 Participant 3rd Position — Meme Mastermind, IIT Patna

LANGUAGES

English, Hindi
